# Reflective Living with Dr. Angela

---

## Your Intellectual Gifts

Did you know that your gift will make room for you and take you before great people?

Plainly speaking, your natural talents, gifts, and abilities will get you noticed by the great men and women in your world.

We have been endowed with intellectual gifts, and it is our responsibility to develop them. When we develop our gifts, they work strategically on our behalf.

We cannot expect our gifts to work for us if we are not developing them or if we don't even know what they are.

Take time to reflect so that you can **identify** your natural talents, gifts, and abilities and so that you can **use** them to make a better life for yourself and for others.

And remember to give yourself  
the gift of reflection.
