

## *Reflective Living with Dr. Angela*

### *Servant Leadership*

#### *Are you a servant leader?*

*Servant leaders are servants first and leaders second.*

*Meeting the needs of others is a priority for them. Servant leaders understand the requirement of thinking about others and they yield to the moral obligation to stop thinking about themselves.*

*Servant leaders are transparent. They also help others to become healthy, wealthy, and wise. They model interdependence as they help others to become more independent.*

*Servant leadership is about relationships and servant leaders honestly value people at their core. Servant leaders invite others to share in the common vision as well as help others fulfill their personal visions.*

*For sure, you increase your capacity to lead as you increase your capacity to serve.*
