

# *Reflective Living with Dr. Angela*

## *Vision for Love*

### *What is your vision for love?*

*Just as you have a vision for other aspects of your life, a vision for love is a great idea. A vision for love will protect your focus and help with the selection and/or screening process.*

*With a vision, you are less likely to compare your desires with those of others. Having a vision affords you the opportunity to develop your patience and fortitude because you know that you can visit the future through your vision at anytime.*

*A vision will also allow you to intentionally attract someone whose values are parallel with yours. But be sure to excavate your own heart's desires to make certain that they are honorable and selfless.*

*If your values are pure, you will rejoice when the person you attract is captivated by the same things that have captivated you.*

***So remember to give yourself the gift of reflection.***
